AADRI MEHTA
Senior Backend Engineer | Payments & Reliability
Bengaluru, India
aadri.mehta@example.com | github.com/aadri-mehta | linkedin.com/in/aadri-mehta | aadri.dev

SUMMARY
Backend engineer with 8 years building payment and ledger systems that stay correct under load. Leads a team of six engineers at a fintech processing about INR 4,000 crore a month. Comfortable owning a system from the SQL query to the on-call rota, and happiest making money movement boring.

EXPERIENCE
Senior Backend Engineer, Paynest Technologies | Bengaluru
Mar 2021 - Present
- Rebuilt the settlement pipeline on Kafka and Go, cutting end-of-day reconciliation failures from 34% to 2%
- Led migration of 60 services from a shared Postgres cluster to partitioned per-tenant stores with zero downtime
- Introduced idempotency keys across the payments API; duplicate charge tickets dropped 4,100 per year to 11
- Mentored five engineers, three of whom were promoted within eighteen months
Technologies: Go, Kafka, PostgreSQL, Kubernetes, Terraform, OpenTelemetry

Backend Engineer, Kite Commerce | Pune
Jul 2018 - Feb 2021
- Owned the checkout and inventory services handling 120k requests per minute at peak
- Cut p99 checkout latency from 1.4s to 380ms by profiling query plans and adding read replicas
- Built the fraud-rule engine used by the risk team, blocking INR 62 crore in suspicious orders in year one
Technologies: Java, Spring Boot, MySQL, Redis

Software Engineer, Nimbus Labs
Jun 2016 - Jun 2018
- Shipped internal billing tooling that replaced a spreadsheet process costing finance 30 hours a month
- Wrote the first automated test suite for the invoicing service, taking release time from two days to three hours

PROJECTS
ledger-check
Open-source double-entry verification library in Go; used by four payment teams and 380 stars on GitHub.
https://github.com/aadri-mehta/ledger-check
Technologies: Go, PostgreSQL

slowquery
A terminal profiler that reads Postgres statement logs and ranks the queries actually costing you time.
https://github.com/aadri-mehta/slowquery

oncall-notes
A small web app that turns incident timelines into blameless written reviews for the whole team.

SKILLS
Go, Java, TypeScript, Python, SQL
PostgreSQL, MySQL, Redis, Kafka, RabbitMQ, etcd
Kubernetes, Docker, Terraform, AWS, GCP, GitHub Actions, Grafana, OpenTelemetry

Distributed systems, double-entry accounting, idempotency, event sourcing, API design, incident response
Leadership, mentoring, technical writing, hiring loops

EDUCATION
B.Tech Computer Science, National Institute of Technology Karnataka, Surathkal
2012 - 2016
Coursework: operating systems, compilers, databases, computer networks

CERTIFICATIONS
AWS Certified Solutions Architect - Professional, 2023

LANGUAGES
English, Hindi, Kannada

INTERESTS
Trail running, chess, restoring old keyboards, writing about money movement
